Our Most Advanced Orbiting Laboratory Takes Flight

The STS-98/*Atlantis* Mission

The *Atlantis* crew will deliver and attach the U.S. Destiny Laboratory to the International Space Station. Crew members will perform three spacewalks to install the Destiny Lab module onto the orbiting station. Destiny is the first research laboratory to be delivered and will support scientific studies ranging from fighting disease to improving home heating systems.

Flight Schedule 2001

Jan. 2001	STS-98 Destiny Laboratory Module
Mar. 2001	STS-102 Logistics and Resupply MPLM
April 2001	STS-100 MPLM, UHF Antenna, SSRMS
May 2001	STS-104 Joint Airlock High Pressure Gas Assembly
June 2001	STS-105 MPLM
Aug. 2001	STS-107 Research Mission
Oct. 2001	STS-108 MPLM
Nov. 2001	STS-109 Hubble Space Telescope Servicing Mission
